Module 3 covers the issues of clinical assessment, diagnosis, and treatment. We will define assessment and then describe key issues such as reliability, validity, standardization, and specific methods that are used. In terms of clinical diagnosis, we will discuss the two main classification systems used around the world - the DSM-5 and ICD-10.

**Module 3: Clinical Assessment, Diagnosis, and Treatment ...**

The federally approved medical practice guidelines for HIV/AIDS are developed by panels of experts in HIV care. More information about the panels can be found in each set of guidelines. The guidelines are available in multiple formats. The brief versions of the guidelines are compilations of the panels' treatment recommendations and tables.
