At the Workshop for Informa>on and Communica>on Technology Staff , organised by the Naonal Judicial Instute, 22nd - 24th May, 2017 1 Computer Hardware Repairs and Maintenance

**COMPUTER HARDWARE REPAIRS AND MAINTENANCE**  
An instruction set architecture (ISA) is the interface between the computer's software and hardware and also can be viewed as the programmer's view of the machine. Computers do not understand high-level programming languages such as Java, C++, or most programming languages used. A processor only understands instructions encoded in some numerical fashion, usually as binary numbers.

**Computer architecture - Wikipedia**  
The system software is a type of computer software that is designed for running the computer hardware parts and the application programs. It is the platform provided to the computer system where other computer programs can execute. The system software act as a middle layer between the user applications and hardware.
