How the United States  
uses energy.

Americans use a lot of  
energy in homes, in  
businesses, and in  
industry, and to travel  
and transport goods.

There are four end-use  
sectors that purchase  
or produce energy for  
their own consumption  
and not for resale: The  
residential sector

**- Wikipedia**

## Access Free Energy Its Use

The potential for solar energy is enormous, since about 200,000 times the world's total daily electric-generating capacity is received by Earth every day in the form of solar energy. Unfortunately, though solar energy itself is free, the high cost of its collection, conversion, and storage still limits its exploitation in many places.
