### International Ethical Guidelines for Epidemiological Studies

14INTERNATIONAL ETHICAL GUIDELINES FOR EPIDEMIOLOGICAL STUDIES “Epidemiology is the study of the distribution and determinants of health-related states or events in specifi ed populations, and the applica- tion of this study to control of health problems.” (John Last, Dictionary of Epidemiology, 4thedition).

### cover Epidemiological 2009.qxd:Layout 1 5.5.2009 13:41 ...

The current text closely follows the content and format of the International Ethical Guidelines for Biomedical Research , and the differences are not readily identified. The epidemiology guidelines, however, are obviously useful for non-US researchers who come under the authority of CIOMS or the World Health Organization (WHO), and they will also serve well in any introductory epidemiology methods class for instruction on ethics.

### International Ethical Guidelines for Epidemiological ...

The mere formulation of ethical guidelines for epidemiological research involving human subjects will hardly resolve all the moral doubts that can arise in association with such research. Nonetheless, the present revised Guidelines are intended at least to draw the attention of investigators, sponsors and ethical review committees to the need to consider carefully the ethical implications of research protocols and the manner in which research is conducted, and thus to conduce to high ...
