Java requires that the constants be defined first, prior to any fields or methods. Also, when there are fields and methods, the list of enum constants must end with a semicolon. Note: The constructor for an enum type must be package-private or private access. It automatically creates the constants that are defined at the beginning of the enum body.

Enum Types (The Java™ Tutorials > Learning the Java ...

How to open articles in your text editor Manual method. A "manual" way of editing in an external GUI text editor is to use copy and paste. Some text editors do not support, or may not be set up to support, various special characters—Chinese characters, non-Latin letters, mathematical symbols, and so on—they are typically replaced with a character that renders as a square.
