The Captarome® range contains high performing dry flavors that provide taste and cost advantage over other flavor encapsulated technologies. The technology offers higher flavor strengths, which reduces the total quantity of flavor ingredients needed. This not only helps reduce flavor costs, but also transportation, inventory and handling costs.

Flavor innovation: development of high-performance flavors

The database systems that perfumers formulate with today are just one of the tools that make this possible. It is well known that modern database systems allow perfumers to track and compare modifications at a glance, have a clear vision of cost and regulatory impact while formulating, share information much more readily, and learn from formulas that have had market success.
