My PC that has Vista 64bit powers up by itself. I was on this PC XP loaded and looked up when I heard the post beep, I quickly depressed the power button and unplugged the power cord from the wall. My friend was over earlier installing software for me. I was wondering if he gave himself remote access rights as he was admin today on it.

PC powers up by itself - Microsoft Community

In video games, a power-up is an object that adds temporary benefits or extra abilities to the player character as a game mechanic. This is in contrast to an item, which may or may not have a permanent benefit that can be used at any time chosen by the player. Although often collected directly through touch, power-ups can sometimes only be gained by collecting several related items, such as the floating letters of the word 'EXTEND' in Bubble Bobble. Well known examples of power-ups that have ent
